

# CSeCTOR Newsletter #1

Elevating OT cybersecurity through specialized online training and resources.

@Csector

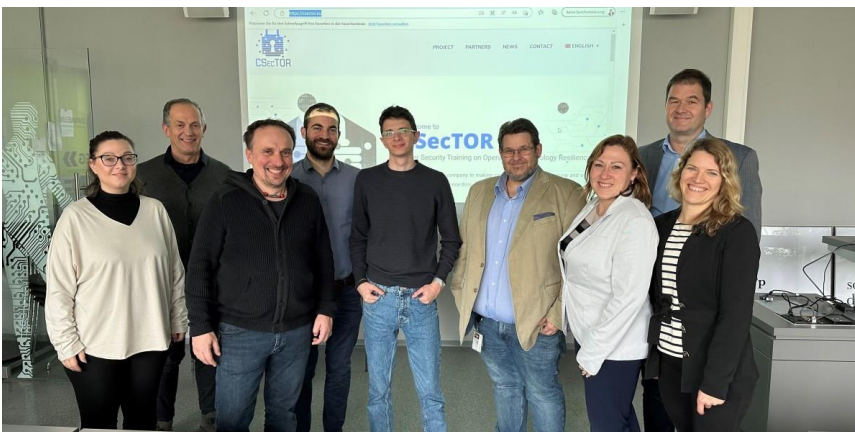

## 1 Introducing the project

In an era where cyber attacks have drastically increased since COVID-19, the European Erasmus project CSeCTOR underscores the importance of cybersecurity in Operational Technologies (OT). While many businesses recognize IT risks, they often overlook protecting their OT. CSeCTOR addresses this issue by providing training and resources aimed at detecting and countering cyber risks. A key component of the project is an interactive online platform featuring comprehensive training materials. The transnational exchange among partners from various countries, including Greece, Cyprus, Italy, and Latvia, enriches the project with diverse experiences and expertise. This project presents a unique opportunity for businesses to bolster their OT cybersecurity and safeguard against cyber threats.

The CSeCTOR project will result in the following outcomes:

- **Online Training Platform:** A dynamic resource for OT cybersecurity training, serving as a project database and a digital upskilling hub.
- **Learning Toolkit:** Hosted on the E-learning platform, this toolkit will equip businesses with practical strategies for OT cybersecurity, informed by the CSeCTOR project's insights.
- **Microlearning Course:** Focused on sustainable cybersecurity practices, this course will provide targeted learning to enhance OT cyber resilience in businesses.

Partner Meeting

**SIGMA BUSINESS NETWORK (Greece)**

Sigma Business Network, legally established in 2008, is a consultancy firm specializing in risk management, business continuity, information security, data protection, and crisis management. With roots dating back to 1997, their team supports clients across Europe, Greece, the Balkans, Cyprus, and the Middle East.

**PCX COMPUTERS & INFORMATION SYSTEMS LTD (Cyprus)**

Founded in 1998, PCX Computers & Information Systems Ltd offers high-quality consulting services in digital transformation, project management, risk management, and business continuity. PCX is committed to providing quality professional training and education to both young people and adults.

**ASSET BASILICATA (Italy)**

ASSET Basilicata, an agency of the Chamber of Commerce, Industry, Crafts, and Agriculture of Basilicata, focuses on training in economics and entrepreneurship, especially for young entrepreneurs. They also assist in business startups, business idea evaluation, and product certification.

**LATVIJAS TIRDZNIECIBAS UN RUPNIECIBAS KAMERA (LCCI, Latvia)**

The Latvian Chamber of Commerce and Industry (LCCI) is a voluntary, non-governmental organization that unites businesses of all sizes across Latvia. LCCI works in business environment development, lobbying, competitiveness enhancement, export support, and arbitration.

**FH JOANNEUM (Austria)**

FH JOANNEUM is one of Austria's leading universities of applied sciences, committed to stimulating innovation through R&D in order to meet sustainability goals and societal needs in line with the principle from idea to implementation.
